

Termite & Weather proof Door Frames

What is Feelwood?

Feelwood is an engineered wood material specifically designed for permanent fixture applications in residential & commercial buildings. Made from advanced polymers, it is the most enhanced material till date with unparalleled advantages and a very long life. EVEN OUTDOORS.

We believe that wood is a scarce and precious resource which can only be replaced by a worthy product. After years of development we have come up with this revolutionary material. Made with unique patented process. Natural wood like surface texture which lets the paint & polish grip Feelwood to give a seamless & long lasting finish.

Rich Surface Texture

Advantages like no other

- Termite Proof & Insect proof
- Water Proof & Weather Proof
- Impact roof
- Enhanced Screw Holding Strength
- No affects of Fungi, Dampness & Warping

- 10 times longer life than natural wood
- Highest Density in its class
- Higher screw holding capacity than WPC (PVC materials)
- Eco Friendly & Recyclable
- Impact strength many folds that of stone
- No seasoning required

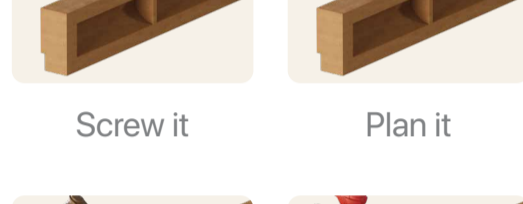

Carpenter Friendly

Material enables working on it very easy.

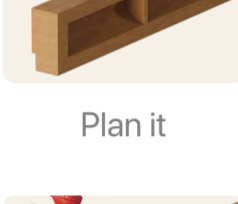

Work exactly like wood, no special tools required. From cutting to nailing, screwing to planing, painting to polishing anything can be done.

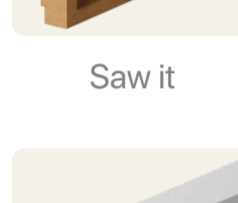

Standard Rebate Size (32mm X 10mm)

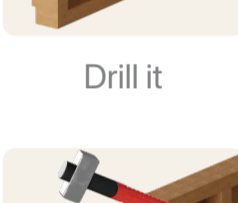

Cut it

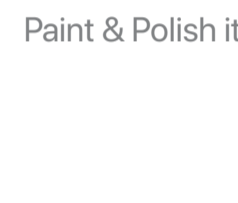

Glue it

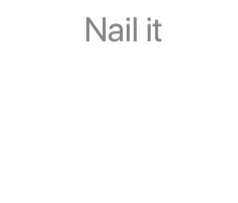

Screw it

Plan it

Saw it
